

*High quality; Reasonable price*  
*Sincere cooperation; Keep improving*

**Taizhou Crene Biotechnology Co., Ltd** cooperate with R & D centers in famous university and GMP manufacture plants. we carry out scientific management. Company provides one-stop services of research - development - production for a variety of special products. Not only do we make effective use of our strong technological strength, but also establish of cooperative relations with several well-known enterprises and research institutions. To the workshop from the laboratory-scale production, with good conditions for the custom synthesis can be achieved from gram to ton-class custom synthesis services. The implementation of these projects in the process, we formed a professional and efficient project management system and team, with a strong technical reserves and core competitiveness.

**(A) The advantages of custom synthesis:**

- 1) Advanced technology, rich experience and full of innovative professional R & D team.
- 2) advanced research and development equipment, flexible pilot plant, improved production facilities
- 3) Perfect Quality Management System, strict accordance with ISO9001: 2008 guidelines and innovation.
- 4) professional project management personnel, a sound project management system.
- 5) the production of custom tailored to help customers reduce the cost of money and time.

We will achieve the following requirements in the custom synthesis business: (1) rapid response; (2) price concessions; (3) quality assurance; (4) timely delivery; (5) detailed data; (6) customer satisfaction.

**(B) The process of customized business:**

- 1) Complete the project analysis and respond to customers in three days after received a single customer consultation;
- 2) Every phase must be confirmed by the customer with program or samples, including small-scale test, pilot and industrial production;
- 3) weekly communication with the customer project progress;
- 4) customer acceptance of products by qualified finished.

**(C) Documents available:**

Synthetic seismogram (synthetic protocol, TLC plans, etc.).

Gas Chromatography (GC).

High Performance Liquid Chromatography (HPLC).

Mass Spectrometry (MS).

NMR Analysis (<sup>1</sup>H-NMR; <sup>13</sup>C-NMR).

Infrared map (IR).

UV map (UV).

**(D) Confidential Commitment**

With regard to the contents of the client, we will be kept strictly confidential. If necessary, may enter into a confidentiality contract. We are willing to work closely with customers at home and abroad to develop the production of new chemical products. No matter what the issue. We are ready to serve you faithfully.
